

Tapan Bhatt, P. Eng, Sr. GDTP

+1 (614) 306-1357 | tapan_bhatt@outlook.com | <https://www.linkedin.com/in/-tbhatt1/>

Results-driven Professional Engineer with years of experience in driving product development, process optimization, and quality assurance within the automotive & manufacturing industry. Proven ability to streamline operations, reduce costs, and enhance productivity through data-driven decision-making and continuous improvement initiatives. Known for leading cross-functional teams through high-stakes, high-pressure program launches & innovative problem-solving.

**Process Optimization (DOE & 6σ) | Risk Mitigation (FMEA) | Design for Manufacturability
Quality Assurance (IATF 16949) | Metrology & MSA | Tolerance & Variation Analysis**

PROFESSIONAL EXPERIENCE

American Honda Motor Company, Inc., Raymond, Ohio

Placed at Honda Auto Development Center through Actalent.

Dimensional Engineer, May 2026 – Present

- Execute advanced Body-in-White (BIW) tolerance modeling and 3D variation analysis using 3DCS, proactively identifying dimensional risks and optimizing design for manufacturability (DFM) prior to launch.
- Serve as a key dimensional engineering resource, collaborating with design, manufacturing, and cross-functional teams to establish robust fixturing, GD&T schemes to optimize for assembly and manufacturability while ensuring world-class vehicle fit and finish.

TI Automotive (former ABC Technologies), North York, Ontario

A Global Tier-1 supplier of automotive systems and components.

Corporate Dimensional Engineer, July 2022 – May 2026

- Led enterprise-wide quality transformation by reducing manufacturing defects by 25% through advanced Six Sigma statistical analysis and cross-functional stakeholder engagement across multiple product lines and OEM programs.
- Developed companies' secondary fixture and gauging standards, optimized SOPs strategy to achieve Single-Minute Exchange of Die (SMED) targets, significantly reducing changeover cost while improving process control.
- Optimized fixture procurement process, reducing cost by 10% and improving alignment with program timing.
- Built a web app (Feature Control Frame generator) that reduced engineering drawing markup time by 40% and improved communication of design intent with customers and suppliers.
- Champion Design for Manufacturability (DFM) reviews and PFMEA workshops during early program phases to identify potential failure modes and mitigate tooling risks.

- Serve as the technical authority on GD&T, executing 3D (3DCS, Sigmetrix cetol 6o) & linear tolerance stack-ups to secure vehicle fit and finish requirements.

LA Metal Stamping Co., North York, Ontario

Tier -2 automotive & commercial supplier for metal stamped parts & assemblies

Quality Engineer, Jan 2021 – July 2022

- Implemented Statistical Process Control techniques to drive continuous process improvement, resulting in a 15% increase in process capability and Process Performance Index for critical product characteristics.
- Successfully introduced real-time data visualization systems (3DCS QDM) across the company, improving operational decision-making by 30% and significantly reduced time spent on raw data compilation.
- Reduced warranty claims by ~23% through effective root cause analysis, DOE process trials, and systematic implementation of 8D methodology, which improved customer satisfaction and eliminating repeat quality issues.

Engineering Technique Co., Baroda, India

Engineering consultancy services

Mechanical Designer, Jun 2017 – Nov 2018

- Led cost-effective mechanical component design, resulting in significant material savings for key packaging project.
- Collaborated with cross-departmental teams to ensure efficiency and alignment, demonstrating strong communication and stakeholder engagement.

EDUCATION

Southern Alberta Institute of Technology, Calgary, Alberta

Bachelor of Applied Technology in Petroleum Engineering, 2021

GPA: 3.96/4.00 with Honours | Inducted into Phi Theta Kappa Honor Society

Gujarat Technological University, Gujarat, India

Bachelor of Engineering in Mechanical Engineering, 2018

First Class with Distinction | PEO & WES Verified Credential for Canadian Equivalency

CERTIFICATIONS & DESIGNATIONS

- Professional Engineer (P. Eng) - Professional Engineers Ontario, Canada
- ASME - Certified Geometric Dimensioning & Tolerancing Professional (GDTP) - Senior Level (Y14.5-2009)
- Dassault Systèmes - Certified SolidWorks Professional (CSWP) – Mechanical Design
- Certified PolyWorks Inspector - probing & scanning applications for portable metrology
